Solutions for Nonprofits

covalience

Overview

Covalience combines global talent with entrepreneurial and international expertise to provide premium, cost-efficient software architecture, engineering and development solutions.

We focus on technology-driven businesses, especially those with SaaS platforms, and provide the guidance and teams they seek to propel innovation and get projects done. Our clients range from funded startups to SMB's to Fortune 500, in a wide variety of market sectors.

Covalience was founded in 2008 and is headquartered in Naperville, Illinois with a Global Development Center in Chandigarh, India.

Our management team brings deep, cross-industry process engineering and technology implementation experience having built their early careers at places like Accenture, IBM, Orbitz, Panduit, and the US Army.

With 30+ countries where our management team has provided technology and consulting services, our clients benefit from deep experience when it comes to building high-performing global teams.

Clients are able to create global working relationships directly with our project management team and team of 60+ full-time employees including software engineers, architects, designers, testers, web developers, and consultants.

Services for Nonprofits

Mobile, Web and Software Development Hybrid Engineering Teams

Mobile Development – Our engineering teams enable mobile technology and solutions in almost every development engagement we work on today. We can help you design and build the right mix of mobile solutions for your organization: from native apps to hybrid apps to web/responsive apps.

Web Development – From design to launch, we can help you to develop your websites and web applications in an array of popular technology stacks (PHP, .NET, Java, Ruby), a wide range of different Content Management Systems (CMS) and other popular web technologies including Payment Processing, Online Stores, CRM's, Customer Service, SaaS system integration, financial systems integration and Web Services integration.

Custom Software Development – When there isn't a good existing system or tool for a particular business function or when our clients want to develop a proprietary system for internal use or external sale, we provide custom software development services. Our engineering teams work with you from requirements definition through launch and beyond to support, maintenance, and ongoing feature development.

Hybrid Engineering Teams – We help you build and manage high-functioning, hybrid teams that seamlessly integrate into your existing team and **we don't break your budget** doing this.

Why partner with Covalience?

- Our consulting experience allows us to better understand your unique business challenges and craft technology solutions to address them.
- Hybrid team solutions mean you have access to a global talent base. Effective cross-cultural communication is built into all of our processes.
- You enjoy transparent communication from all of our team members for clear project visibility.
- Your development costs are reduced through hybrid teams.

Our focus on providing you quality and measureable results are enabled via integrated quality assurance and agile methodologies from engagement ramp-up to project wind-down.

We have experience **partnering with nonprofits** to help them succeed.

For example, Christianity Today International (a nonprofit, global media firm headquartered in Carol Stream, Illinois) partnered with us and continues to reduce costs, free up resources to focus on innovation and extend capacity to develop great content for the Web.

To learn more, please go to the **Customer Stories** page of our website.

Stronger Teams.
Work Better Together.™

Covalience provides **premium, trusted** software development teams to **propel innovation** and **get projects done**.
